

Leadership through data insights

Allied Health Benchmarking

A 10-year continuous NDIS Allied Health data lake covering 25% of the therapy market

- Australia's most well-regarded Allied Health service providers are participating and benefiting from greater insights (large and small).
- We design our benchmarking product with participating members, so you can **compare performance against your peers.**
- **Granular Postcoded data** - deep dive into billable time, service hours by job and level or workforce metrics at **the activity level.**
- **Highest level of data integrity** and access to our online analytics via a Microsoft **Power BI platform.**
- **Offers a range of other member services** including data expertise, networks and collaborative forums and data-driven communities of practice that focus on innovation and best practice improvement in your organisation.
- Ability Roundtable **develops White Papers to tell the sector's story** and helps to **support NDIA policy decisions** with real data.
- Annual series of **briefings and facilitated meetings**, including **annual 2-day national meeting**, supports members to identify improvement opportunities.
